Location: Manchester

Consideration	Characteristics of Area				
Flood Vulnerability	●	●			
Heat Vulnerability	●	●	●		
Social Vulnerability	●	●	●		

The southeastern corner of Manchester is crossed by multiple brooks, including Hop Brook, Porter Brook, and Birch Mountain Brook, and is also home to multiple educational facilities, recreational assets, and a fire station. This area experienced flooding during the summer storms of 2021, including a washout of Charter Oak Park that resulted in the loss of several ball fields. The wider area is characterized by moderate flood vulnerability, heat vulnerability, and social vulnerability.

Connecticut Resiliente 2.0 Fase II

Áreas Regionales de Oportunidad de Adaptación/Resiliencia

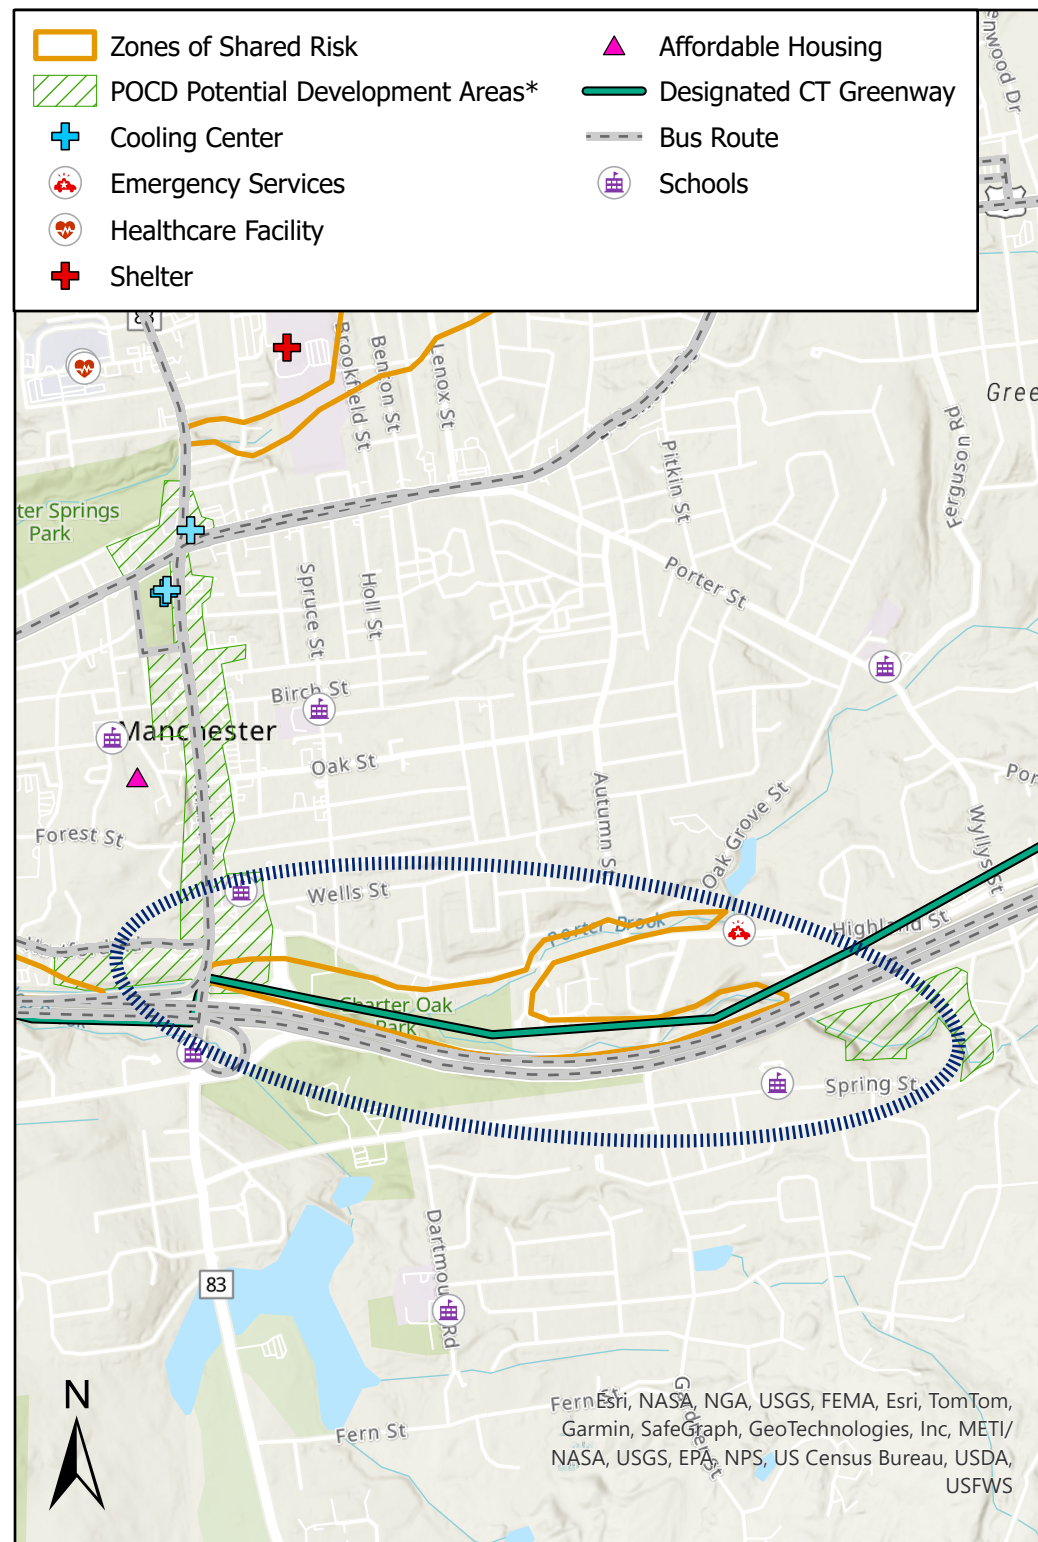

Nombre: Hop Brook & Connecting Brooks

Localización: Manchester

Consideración	Características de la zona				
Vulnerabilidad a Inundaciones	●	●			
Vulnerabilidad al Calor	●	●	●		
Vulnerabilidad Social	●	●	●		

La esquina sureste de Manchester está atravesada por varios arroyos, incluidos Hop Brook, Porter Brook y Birch Mountain Brook, y también alberga múltiples instalaciones educativas, activos recreativos y una estación de bomberos. Esta área experimentó inundaciones durante las tormentas de verano de 2021, incluido un lavado de Charter Oak Park que resultó en la pérdida de varios campos de béisbol. El área más amplia se caracteriza por una vulnerabilidad moderada a las inundaciones, al calor y a la vulnerabilidad social.
