

# Resilient Connecticut 2.0 Phase II

## Regional Adaptation/Resilience Opportunity Areas

Name: Mile Lane & La Rosa Lane Critical Facilities  
 Location: Middletown

Consideration	Characteristics of Area			
Flood Vulnerability	Low	Medium-Low	Medium-High	High
Heat Vulnerability	Low	Medium-Low	Medium-High	Medium
Social Vulnerability	Low	Medium-Low	Medium-High	High
The Mile Lane and La Rose Lane area of Middletown contains both critical infrastructure and flood risk from West Swamp Brook and East Swamp Brook. The area is characterized by high flood vulnerability, moderate heat vulnerability, and high social vulnerability. Mile Lane contains a culvert that failed twice during the storms of summer 2021. Lawrence School access could potentially be cut off by West Swamp Brook crossing Kaplan Drive. The high school is the primary shelter for the City and can also serve as a cooling/warming center, but may face similar egress issues due to flooding.

## Áreas Regionales de Oportunidad de Adaptación/ Resiliencia

Nombre: Mile Lane & La Rosa Lane Critical Facilities  
Localización: Middletown

Consideración	Características de la zona			
Vulnerabilidad a Inundaciones	●	●	●	●
Vulnerabilidad al Calor	●	●	●	
Vulnerabilidad Social	●	●	●	●
<p>El área de Mile Lane y La Rose Lane de Middletown contiene infraestructura crítica y riesgo de inundación de West Swamp Brook y East Swamp Brook. El área se caracteriza por una alta vulnerabilidad a las inundaciones, una vulnerabilidad moderada al calor y una alta vulnerabilidad social. Mile Lane contiene una alcantarilla que falló dos veces durante las tormentas del verano de 2021. El acceso a la escuela Lawrence podría verse interrumpido por West Swamp Brook cruzando Kaplan Drive. La escuela secundaria es el refugio principal de la ciudad y también puede servir como un centro de enfriamiento / calentamiento, pero puede enfrentar problemas de salida similares debido a las inundaciones.</p>
