

# Resilient Connecticut 2.0 Phase II

## Regional Adaptation/Resilience Opportunity Areas

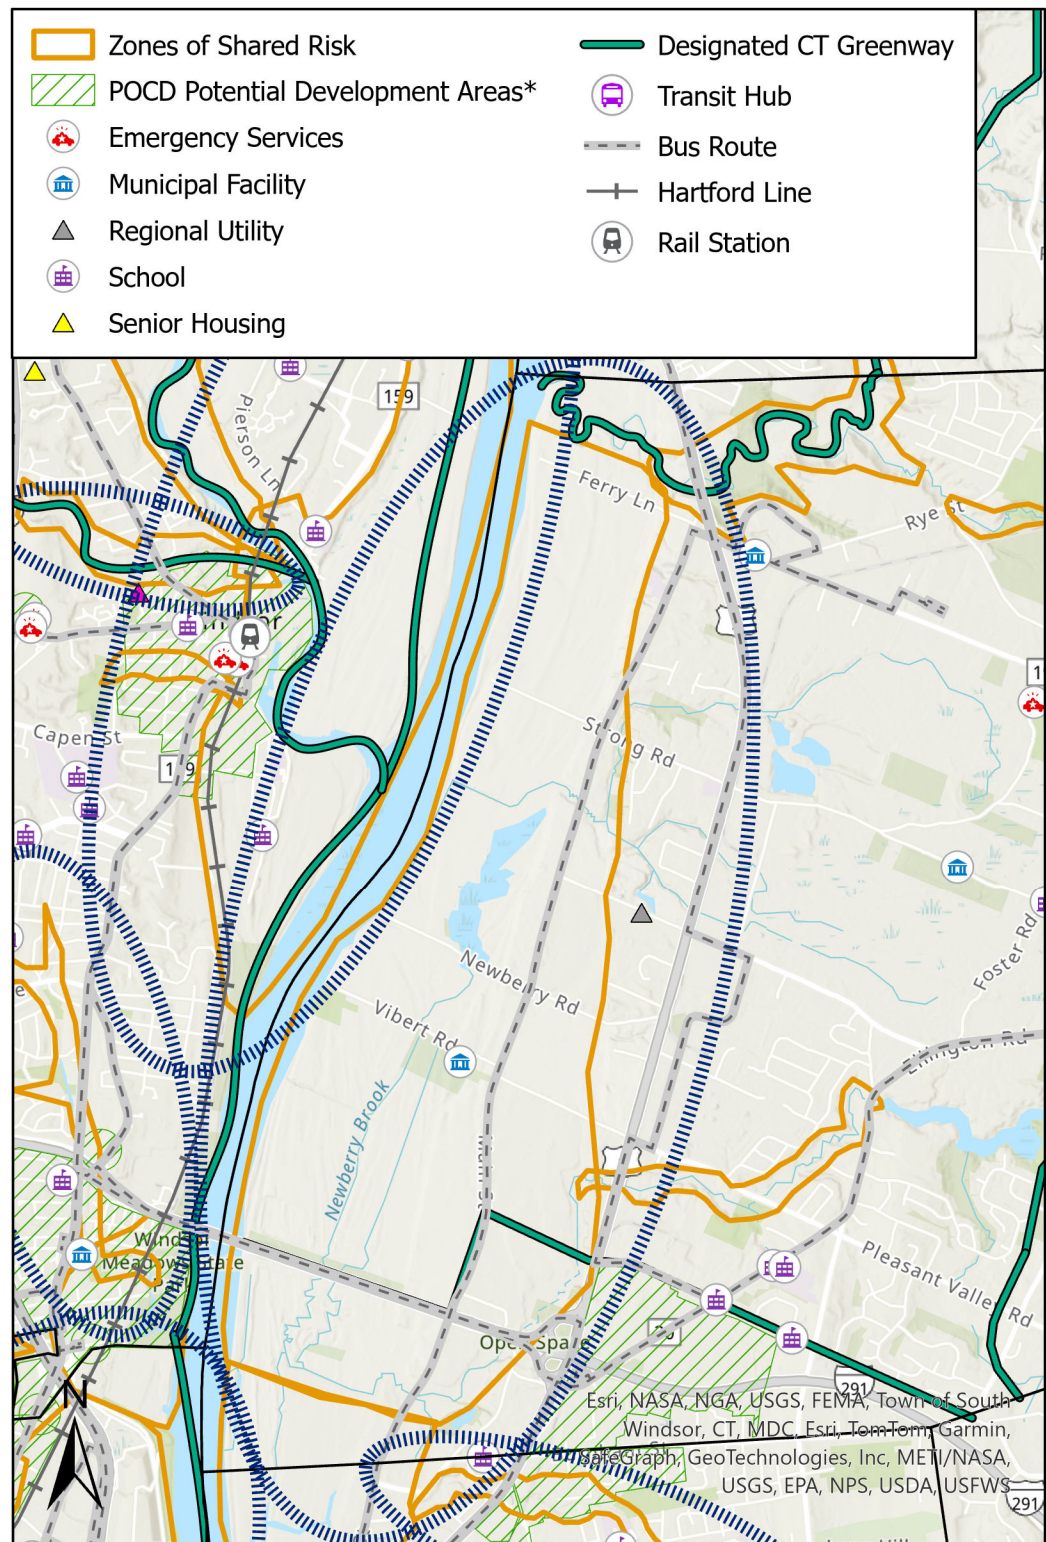

Name: CT River Flood Zones - South Windsor

Location: South Windsor

Consideration	Characteristics of Area				
Flood Vulnerability	●	●	●	●	
Heat Vulnerability	●	●	●		
Social Vulnerability	●	●	●	●	

The western portion of the Town of South Windsor is characterized by moderate to high flood, heat, and social vulnerability. The 1% annual chance flood zone associated with the Connecticut River overlaps with multiple roads as well as the Town's Water Pollution Control Facility. In addition to the flood vulnerability associated with the Connecticut River, this ROAR also contains Newberry Brook, which is also in close proximity to the Water Pollution Control Facility.

South Windsor Water Pollution Control Facility  
 HyAxiom Fuel Cell Plant  
 Scantic River Greenway

\*Areas identified in POCDs as supporting development, redevelopment, or other types of economic activity
