

Resilient Connecticut 2.0 Phase II

Regional Adaptation/Resilience Opportunity Areas

Name: North Canton Volunteer Fire Association

Location: Canton

Consideration	Characteristics of Area				
Flood Vulnerability	●	●	●		
Heat Vulnerability	●	●			
Social Vulnerability	●				

The North Canton Volunteer Fire Association facility is located in close proximity to Cherry Brook. Unlike some of the larger ROARs identified through the Resilient Connecticut program, this site was selected because an individual critical facility is located so close to a flood zone. The primary vulnerability for this ROAR is flood-related, with relatively low heat and social vulnerability.
