

Resilient Connecticut 2.0 Phase II

Regional Adaptation/Resilience Opportunity Areas

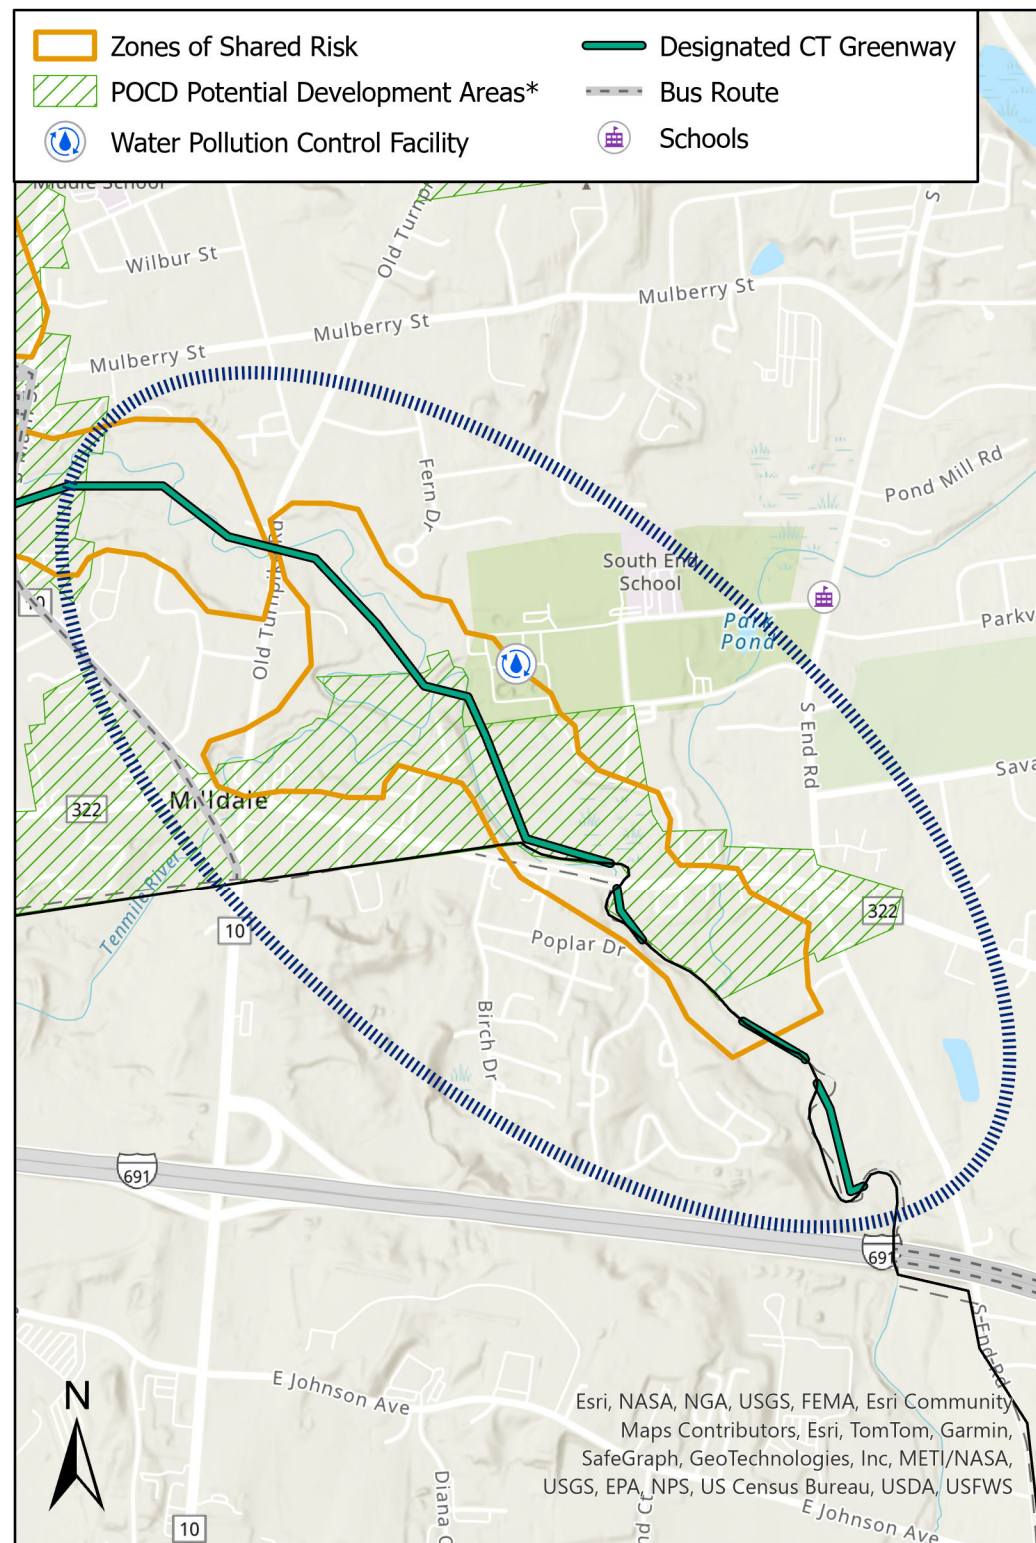

Name: Quinnipiac River

Location: Southington

Consideration	Characteristics of Area				
Flood Vulnerability	●	●			
Heat Vulnerability	●	●	●		
Social Vulnerability	●	●	●	●	

The Quinnipiac River intersects with the Tenmile River in the Milldale section of Southington, and the associated 1% annual chance flood zones cross multiple roadways in the area. The town's Water Pollution Control Facility as well as the South End School are both located within this ROAR; additional flood vulnerability near the school is associated with Misery Brook. The broader area is characterized by moderate to high flood and heat vulnerability, as well as high social vulnerability.

Southington Water Pollution Control Facility
 South End School
 Quinnipiac River Greenway

*Areas identified in POCDs as supporting development, redevelopment, or other types of economic activity
